Mines and Mining Stocks

Management Says the Recent
Published Reports Were
Grossly Exaggerated.

Goldfield, Nev., May 26.—Although no immediate announcement from the officials of the Consolidated Mines company is expected regarding the matter of enlarging the capacity of the new 600-ton mill, it is believed that steps will be taken within the next few months to interest the control of the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salling value of \$49,609.25, changed hands. Following is the list of final quotients and the salli crease the plant by the addition of bat- tatio teries, bringing the total number of the doubling the present equipment of 190. The present coarse crushing and belt-conveying capacity is ample to supply ore for 200 stamps and but little additional expense would be entailed in the installation of this equipment. Manager John H. Mackenze has declined to be quoted in this connection recently, although at the time the mill was completed he said in an interview that such action would probably be taken during the present year to case it was justified by the plume of ore reserves, and these reserves have been augmented since that time far beyond the most sanguine hopes of the managers.

The two mills of the Consolidated are stamps up to at least 150 and possibly

managers.
The two mills of the Consolidated are Century managers.

The two mills of the Consolidated are now treating about 650 tons of ore daily. the average value being slightly under \$40 per ton. Some statements of the company's ore and bullion production that have been published locally are pronounced by the management to be grossly exagerated. A local paper stated recently that the company had produced during a single week in May a total or \$523, 600, including high grade ore shipments from the Hampton stope valued at \$300. 600. The managers say there is no authority for these figures and that during the week in question not a pound of ore was shippied and the recovery of gold was lighter than for some time before, the mill heads being maintained below as lighter than for some time before, the mill heads being maintained below as lighter than for some time before, the mill heads being maintained below as lighter than for some time before, the mill heads being maintained below and in the recovery of gold was lighter than for some time before. The mill heads being maintained below and in the recovery of gold was lighter than for some time before, the mill heads being maintained below as lighter than for some time before. The considered company in New York on May 27 and the company in New York on May 27 and the chief point of interest has been the election of a president to succeed Senator George S. Nixon, whose mining interests in toto have been taken over by George Wingfield and associates. Wingfield, Manager Mackenzie and Secretary Howe are all in New York for the purpose of attending this meeting, but before they left neither would commit himself to the expression of an opinion regarding any action of the directors or the probability of the election of any person to the position of president of the company.

Round Mountain
Rawhide Coalition

(Special to The Herald.) (Special to The Herald.)

Boston, Mass., May 26.—None of the larger sellers of copper will contract for August deliveries. There are inquiries in the market for August copper, but thus far no trade has resulted. There have been very heavy sales of the metal for delivery up to and including July 31, and orders for spot copper are being filled only at advance prices. The selling interests are practically sold up for the next two months and are talking 14-cent copper or better within a short time.

From the best obtainable information at the present moment, it is the fixed purpose of the Ohio management to have the plant working on ore during July, white every section of the plant in operation during that month. That Engineer Kidney has been ordered here to give his personal attention to the work and hurry the plant to completion, there is no doubt and as Manager Colin McIntosh has the and, as Manager Colin McIntosh has the mill-finishing task well in hand and the mine is shaping up in fine shape for the production of such tonnage as will be required when operations begin, there is no reason to suppose that there will be any serious delays in cutting loose according to schedule.

reason to suppose that there will be any serious delays in cutting loose according to schedule.

The present weakness of Ohio Copper stock is an entirely different matter. No one here claims to have the least idea of what is affecting the market and representatives of the company appear to care less. The mine and mill end of the proposition is being carried through in a manner that would cause every shareholder in the company not playing the market game to stand pat could be see just how matters stand. If they are not nervy enough to do that, according to brokers who evidently understand something about the situation, they had better loosen up now, before the main show starts and the big play is made to shake out all the weak holdings. As one broker put it yesterday:

"The fellows who want to stay in Ohio had better keep their margins well protected and take on all the stock they are able to buy if prices are crowded lower during the next thirty days. The stock will jump in July."

THREE COMPANIES QUALIFY FOR BUSINESS

ROLLING OUT THE ORE

A story was started Tuesday evening and kept working yesterday to the effect that the first-class ore at the Columbus Consolidated had petered out and that the

Consolidated had petered out and that the teams which had been engaged in hauling from the lower terminal of the tramway had been laid off.

Inquiry at the offices of the company developed the fact that Manager Jacobson was at the mine: that about forty teams were still hauling ore to the sampler at Sandy and that the number of men engaged in hauling now is greater than it has ever been.

'If the mine does not look as well now or better than it ever has done,' said Secretary Val Snow, "something must have happened that I know nothing about. But Mr. Jacobson will be back in a day or two and you can get particulars Ajax-1.0000a149c, Beck Tunnel-100654c, seller 60; 200@55c; 100@55c, seller 60. Bullock-500@3% o: 500@3% o. We Are Not So Egotistical as to Claim We Are the "Only Pebble on the Beach"

Or that there are no other clothing stores selling fine, ready-for-service clothes---there are.

There are a good many of them in Salt Lake and the clothing merchants in Salt Lake as a rule are fine fellows too. Of course there are some fakirs---some houses who pretend to offer legitimate merchandise at ridiculously low prices--- "there's a nigger in the fence."

Beware of the fellow who pretends to give you something for nothing. When you want reliable merchandise go to a reliable house for it.

You'll always be on the safe side if you wear clothing bearing the "Princeton Label" --- "the finest on earth."

basis.

John Hawes of this city, who is treasurer and manager of the company, has arranged to send out an additional crew of men on tonight's train, the object being to pound the shaft down to the 100-foot level as rapidly as possible.

GUGGENHEIMS AND AMALGAMATED QUITTING

Within the next few months practically all of the contract relations now existing between the Guggenheims and the interests affiliated with the Amalgamated Copper company will have ceased.

On April 1 last the contracts which the United Metals Selling company had for marketing the output of the Utah Copper company expired and the same were turned over to the Guggenheims, who have been refining the Utah product at their Baltimore refinery. The Utah Copper company is now producing at the rate of 0,000,000 pounds of copper annually.

One, but he did not feel at liberty to say anything about it for publication.

M. R. Evans was due to return from his trip through the Deep Creek country by auto yesterday afternoon. He had not put in an appearance at 4 o'clock, and it may be that he delayed returning a day or two.

J. C. Sullivan, manager of the Raymond-Illinois company's property at Tintic, was in the city yesterday on one of his periodical trips.

Nine carloads of ore from Utah mines were released by the Taylor & Brunton sampler yesterday morning.

Manager Solon Solro of the Silver King (Boston News Bureau.)

In 1916 there will expire the contract between the Utah Consolidated and the Guggenheims under which Utah Consoli-dated ores have been treated at the Gar-field smelter of the American Smelting & Refining company. A ten-year contract will then go into effect with the International Smelting & Refining company, under which the smelting of Utah Consolidated ores will be carried on at the new smelter now being erected at Tooele, Utah.

The recent approximate the smelting of the contract of the smelting of the company of the smelting of the company of the smelting of the contract of the company of the smelting of the contract of the company of the contract of the contrac

The present arrangement provides that the Guggenheims shall treat as a maximum 300,000 tons of ore yearly, while the new contract names 1,200 tons a day, at a rate which will be 67.60 cents per fon more favorable to the Utah Consolidated company.

Anthony H. Godbe and Colonel J. L. Hackett. officials of the Prince Consolidated and Ohio-Kentucky companies, have gone to Pioche to look over the mines for a few days.

The British-American Development company. ompany. Prior to the differences which have risen between the Amalgamated-United

Metals Selling company interests and the American Smelting & Refining company, all but about 50,000,000 pounds of the copper produced by the Guggenheim companies were marketed through the United Metals Selling company until about a year ago, when the Guggenheims decided to market all of their own product. to market all of their own product through the American Smelters Securities

FAMOUS ENGINEER OVER FROM NEVADA CAMPS

Silver, 525%c per ounce. Copper (cathodes), 1213-16c per pound. Lead, \$4.39 per 100 pounds. Mining Notes.

Four carloads of ore from Utah mines and one from Nevada were released from the Pioneer sampler yesterday.

C. H. Gitsch returned from a trip to Nevada, where he has been making an examination of a lead-silver proposition for Frank J. Hagenbarth. The property, Mr. Gitsch says, is a most likely looking one, but he did not feel at liberty to say anything about it for publication.

Manager Solon Spiro of the Silver King Consolidated company left for the Park again yesterday to note the progress of development in his company's property, which is said to be reaching a most interesting stage just now.

The British-American Development company, operating in the Little Cottonwood mining district, yesterday purchased a compressor plant from the Richmond Machinery company that will be shipped at once. It is to be electrically operated on power supplied by the Columbus Consolidated company.
